Election/Restrictions

Restriction to one of the following inventions is requirement under 35 U.S.C. 121:

I. Claims 1-6 and 10-22, drawn to selecting via a web page a plurality of recipe programs associated with an intelligent appliance wherein the plurality of recipe programs are a subset of recipe programs chosen from a group of recipe program available to be chosen for the intelligent appliance; storing the selection of the plurality of recipe programs in a user profile at a location remote from the intelligent appliance; downloading at least one of the plurality of recipe programs to the intelligent appliance; receiving a message from the intelligent appliance requesting a new recipe program, the message being sent from the intelligent appliance without user intervention; and upon finding the new recipe program in a database, transmitting the new recipe to the intelligent appliance, classified in class 700, subclass 90.

II. Claims 7 and 9, drawn to a user identifier element that identifies a record in a database an appliance identifier element linked to the user identifier element that identifies an intelligent appliance; a plurality of recipe program elements linked to the appliance identifier element; and an unique product code element associated with at least one of the plurality of recipe program elements, classified in class 707, subclass 1.

Inventions I and II are related as combinations disclosed as usable together in a single combination. The combinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility such as "a user

identifier element that identifies a record in a database an appliance identifier element linked to the user identifier element that identifies an intelligent appliance; a plurality of recipe program elements linked to the appliance identifier element; and an unique product code element associated with at least one of the plurality of recipe program elements..". See MPEP j 806.05(d).
